Introduction

This release guide documents release 8.7 of Banner® Web Tailor. Release 8.7 includes enhancements and problem resolutions since release 8.6.1.

Change Request Enhancements

The following enhancement was addressed in Banner Web Tailor 8.7:

- CR-000117243

CR-000117243 - SSB Session Tracking

Banner Web Tailor has been enhanced so that SSB users can now see some additional information that they were not able to see prior to 8.7.

Previously, SSB used a pool of sessions and the session information changed dynamically, which made it difficult to identify a specific user. As a result of this enhancement, the *ID*, *Procedure* and *IP* are put into *v\$session* during a call to *f_validuser*. Then, in *p_closedoc*, the information is changed to indicate *LAST KNOWN SSB ID*.

Modified objects

The following object was modified with this enhancement:

- dbprocs/twbkwbi1.sql

Resolutions
