# Updates for Banner Student Class Schedule

---

This release guide documents Release 9.3 of Banner® Student Class Schedule. This release contains change request resolutions.

**Note:** Supplemental Data Engine (SDE) is not available in this release due to performance issues. Improved performance will be available in a future release.

Please refer to the *Banner Student Class Schedule Installation Guide 9.3* for information on the following hardware and software requirements, tested browser and tablet versions, and other installation prerequisites.

- Hardware
  - Oracle Database
  - CPU and memory
  - Application server
  - Application server and operating system combinations
- Banner software
- Other Ellucian software
- Supported browsers
- Java
- Tablets
- JAWS screen reader
- Database Extension Utility

## Documentation

---

The Banner Student Class Schedule 9.3 release includes the following documentation:

- *Banner Student Online Help for Course Catalog and Class Schedule*
- *Banner Student Class Schedule Resolutions Report*
- *Banner Student Class Schedule Release Guide*
- *Banner Student Class Schedule Handbook*

- *Banner Student Class Schedule Installation Guide*
- *Banner Database Upgrade Guide 9.0*

## Translation

---

Banner Student Class Schedule 9.3 supports the following languages:

- English (Australia)
- English (Great Britain)
- English (Ireland)
- English (India)
- English (United States)
- Arabic
- French
- French (Canada)
- Portuguese (Brazil)
- Spanish

## Navigate between 9.x modules

---

**Warning!** When CAS is not enabled, you will need to log into the Banner Student modules separately.

## Single Sign On with CAS

Please refer to the *CAS Single Sign On Handbook* for information on using CAS and the SSO Manager.

## Extensibility tools

---

The Banner Extensibility tools enable you to make changes to your Banner 9.x applications without having to change the source code. The Extensibility tools available to you as part of this release are the Customize Page Components Tool for ZK Applications and the Domain Extension Tool. For more information on the Banner Extensibility Tools, see the Banner Extensibility Documentation Library in the Ellucian Support Center.

The Customize Page Components Tool is embedded in this release of the application, but additional installation steps that must be taken to enable its functionality.

The Domain Extension Tool requires application source code and is only available via the Ellucian source code repository. If you want to use this tool, you will need to establish a development environment and request access to the repository. More information can be found in the *Domain Extension Tool for Developers Handbook*.

If you want to use either of these tools, you may need to check with the person who completed the installation of the application to make sure they took the additional steps to enable the Extensibility tools.

## Customize Page Components Tool for ZK Applications

The Customize Page Components Tool for ZK Applications enables you to customize delivered user interface common components and add new common components onto a page. With it, you can hide fields that are not required, change the field type of delivered fields (within the bounds of the database functionality), and change the characteristics of fields.

It is designed to be used primarily by a business analyst or functional application expert. The user should be someone who understands the application and basic relational database concepts. Users with the proper security can access the Customize Page Components Tool directly from the Tools menu on the Banner 9.x page they want to change.

## Domain Extension Tool

The Domain Extension Tool enables you to make changes to a domain without having to change the Ellucian source code. It is intended to be used by an experienced developer.

# Known Issues

---

The following items are in progress at this time.

## Options filter

For this release, the Options filter item in the Add Another field selection has been disabled on SSASECQ. This was done to prevent inaccurate results when the filter is set equal to `None`. This issue will be corrected in a future release.

## Calendar date selection

On SSASECT, selecting a date from the calendar can return a different, incorrect date.

When a date is selected from the calendar (date picker) that does not fall between the part of term section start and end dates, the start and end dates can default to the section start and end dates. When the changes are saved, the following error message is displayed *Section end date must be less than or equal to section end date*.

When a date is entered manually, and the date does not fall between the section start and end dates, the entered date is displayed. When the changes are saved, the error is correctly displayed.

## Save section error message

On SSASECT, when an existing section is copied and saved, a message about prerequisites is correctly displayed, but then another message, *The Section is not unique and cannot be saved*, is sometimes displayed. This message is not helpful. This occurs for a traditional class, where it is valid to have multiple sections with a section ID of 0.

## Crosslist code not updated

On SSASECT, when a crosslist code is selected from the valid list, the data is verified on SSAXLSQ, and the change is populated on SSASECT, saving does not reflect the changes. The message *No changes to save* is displayed.

## Unable to save valid data

When a user attempts to save valid data on SSACLBD, a Java error occurs. This happens when Banner Finance is not installed (`GUBINST_FINANCE_INSTALLED` is `N`), the

**Insert** button is not displayed, and the insert function from the block header is used instead.

## MEP codes

Although a user who is authorized for multiple MEP codes is allowed to pick a new code from within the application, the change does not actually take place. The user must sign out and then sign back in with the new MEP code.

# Resolutions

---

The *Banner Student Class Schedule Resolutions Report 9.3* is a companion to this release guide. The Resolutions Report provides summary information about the change requests that are resolved in Banner Student Class Schedule 9.3. Use the following steps to access the Resolutions Report on the Ellucian Support Center:

1. Go to the Ellucian Client Support web site: <http://www.ellucian.com/Solutions/Ellucian-Client-Support>.
2. Click the **Ellucian Hub** button to log in to the Ellucian Hub.
3. Choose the Ellucian Download Center application.
