Introduction

This release guide documents the Banner® Student Course Catalog 9.4 release. This release contains updates for problem resolutions.

Warning! *Release 9.4 is not cumulative to Banner 8.x.*

Please note that SAML 2.0 SSO is not supported with this Banner 9.x application release.

Release Information

This section contains information on requirements, documentation, translation, and extensibility.

Requirements

Please refer to the *Banner Student Course Catalog Installation Guide 9.4* document for information on the following hardware and software requirements, tested browser and tablet versions, and other installation prerequisites.

- Application server
- Application server and operating system combinations
- Banner software
- Other Ellucian software
- Oracle Database
- Supported browsers
- Java
- Tablets
- JAWS screen reader
- Database Extension Utility

Release tagging

Use the following tags for application source code in the git repository.

Application	Tag
Course Catalog	rel-cat-sched-9.4

Supplemental Data Engine

Supplemental Data Engine (SDE) is supported for this release.

Multi-Entity Processing

Multi-Entity Processing (MEP) is supported for this release.

Navigate between 9.x modules

Warning! When CAS is not enabled, you will need to log into the Banner Student modules separately.

Single Sign On with CAS

Please refer to the *CAS Single Sign On Handbook* for information on using CAS and the SSO Manager.

Documentation

The Banner Student Course Catalog Release 9.4 includes the following documentation:

- *Banner Student Online Help*
- *Banner Student Course Catalog Release Guide*
- *Banner Student Course Catalog Resolutions Report*
- *Banner Student Course Catalog Installation Guide*

The *Banner Database Upgrade Guide* is also used with this release but is delivered separately.

APIs

You can access API documentation for Banner Student Course Catalog in the Ellucian Support Center. API documentation is located in the XE Registry under Banner XE API.

Translation

Banner Student Class Schedule 9.x supports the following languages:

- English (Australia, Great Britain, India, Ireland, United States)
- Arabic

- French
- French (Canada)
- Portuguese (Brazil)
- Spanish

Extensibility tools

The Banner Extensibility tools enable you to make changes to your Banner 9.x applications without having to change the source code. The Extensibility tools available to you as part of this release are the Configure Page Components Tool and the Domain Extension Tool. For more information on the Banner Extensibility Tools, see the Banner Extensibility Documentation Library in the Ellucian Support Center.

The Configure Page Components Tool is embedded in this release of the application, but additional installation steps must be taken to enable its functionality.

The Domain Extension Tool requires application source code and is only available via the Ellucian source code repository. If you want to use this tool, you will need to establish a development environment and request access to the repository. More information can be found in the *Domain Extension Tool for Developers Handbook*.

If you want to use either of these tools, you may need to check with the person who completed the installation of the application to make sure they took the additional steps to enable the Extensibility tools.

Configure Page Components Tool for ZK Applications

The Configure Page Components Tool for ZK Applications enables you to customize delivered user interface common components and add new common components onto a page. With it, you can hide fields that are not required, change the field type of delivered fields (within the bounds of the database functionality), and change the characteristics of fields.

It is designed to be used primarily by a business analyst or functional application expert. The user should be someone who understands the application and basic relational database concepts. Users with the proper security can access the Configure Page Components Tool directly from the Tools menu on the Banner 9.x page they want to change.

Domain Extension Tool

The Domain Extension Tool enables you to make changes to a domain without having to change the Ellucian source code. It is intended to be used by an experienced developer.

Resolutions

The *Banner Student Course Catalog Resolutions Report 9.4* is a companion to this release guide. The Resolutions Report provides summary information about the change requests that are resolved in Banner Student Course Catalog 9.4. Use the following steps to access the Resolutions Report on the Ellucian Support Center:

1. Go to the Ellucian Client Support web site: <http://www.ellucian.com/Solutions/Ellucian-Client-Support>.
2. Click the **Ellucian Hub** button to log in to the Ellucian Hub.
3. Choose the Ellucian Download Center application.
