

Every student in the Aviation Program is required to have an *FAA Medical Certificate Second Class*. This is a physical conducted by an FAA medical examiner (AME) who will check out your physical health, mental health, and criminal background history. It **MUST** be done by an AME; you cannot go to your regular doctor. A Second Class Medical is good for one year from the date that it is issued, and usually costs you about \$100. Please go to <https://medxpress.faa.gov/medxpress/> to begin your medical certificate application (required and will expedite the process). Then, call your AME to make an appointment; to find one near you, please use the following links: <http://www.faa.gov/pilots/amelocator/> or <http://flightphysical.com>

Note: Fixed-Wing applicants interested in the SkyWest Pilot Pathway Program are encouraged to get a First Class Medical, as this will be required later.
